

GETTING IN TUNE

WHO ARE WE

CFI produces industrial components for refrigeration and air conditioning. Founded in 1988 in one of the most vital and dynamic production areas of north-eastern Italy, the company has been able to evolve rapidly thanks to a mission that focuses on:

Flexibility

Delivery speed

Customization

Investments in machinery, research and development

Training and development of human skills

THE VALUE OF THE PEOPLE

Each of our products is born from the synergy and collaboration between people. The contribution of each of our 110 collaborators is fundamental and decisive for the quality of the final result. Dialogue, synergy, interaction and integration are the key values on which CFI continues to invest, and thanks to which for over 30 years it continues to be a reference point in the market.

years experience

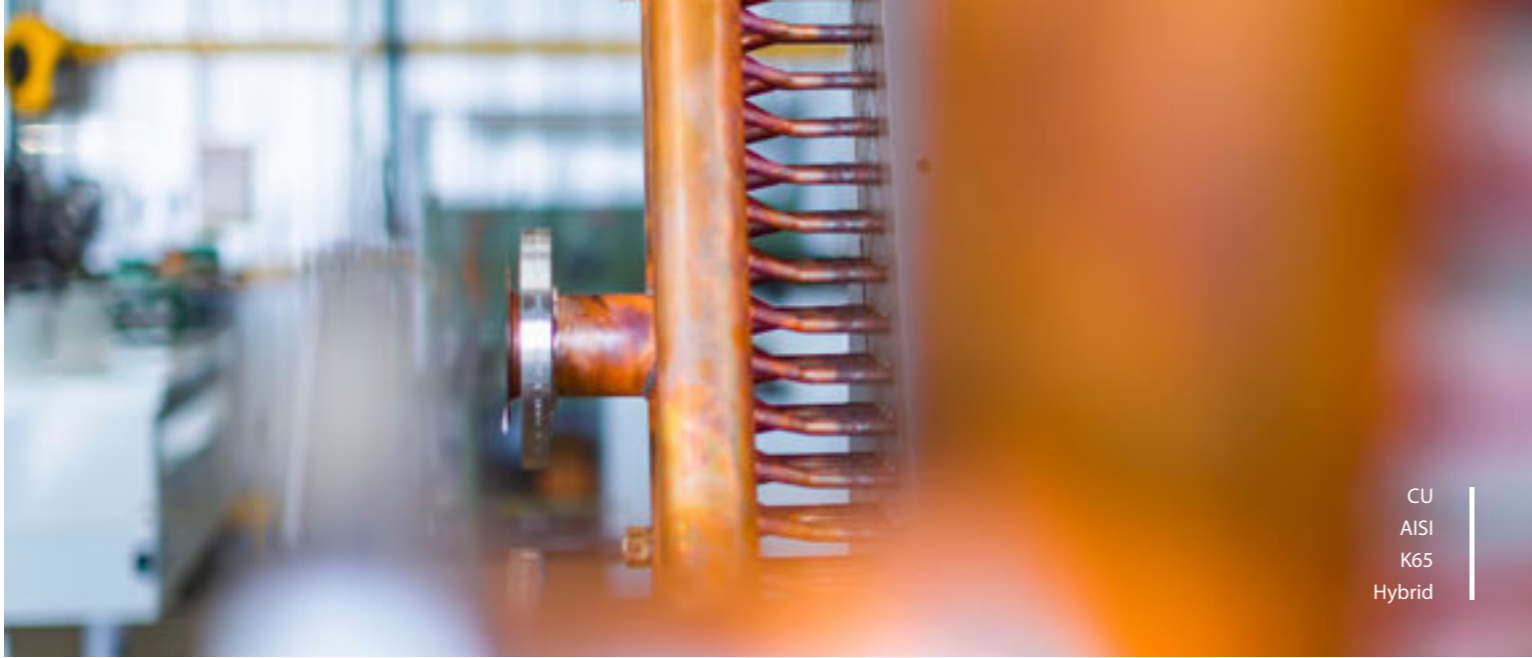

PRODUCT FAMILIES

The production range of CFI includes all the essential components for the production of heat exchangers: manifolds, distributors and bends. In 2015, with the construction of the second production site in Asigliano, CFI dedicated an entire department to the production of pipe assemblies for refrigeration circuits.

MANIFOLDS

Complete range of manifolds for heat exchangers, up to diameter 159 mm (copper) and 6" (steel).

U-BENDS

The main production plant of bends in Europe, with an output of over 60,000,000 pieces divided between bends and crossovers, with and without brazing rings.

CU
 AISI

GAS DISTRIBUTORS

Customized production of liquid distributors with straight or custom-shaped capillaries.

CU
 AISI

PIPES

Complete range of connection pipes for refrigeration circuits, up to diameter 133x3 mm, and connection of flanges, valves and special fittings.

WORKING PHASES AND PRODUCTION PROCESS

Each of our products is based on a specific customer design. The control and monitoring of the production flow is of great importance to be able to respond to the needs of the market in ever-tighter times. CFI is able to process custom orders within 3-5 working days.

1 Cutting

Cutting - Cut the tube to size

2 Bending

Bending - A wide range of latest generation bending machines allows CFI to shape pipes up to a diameter of 133 x 3

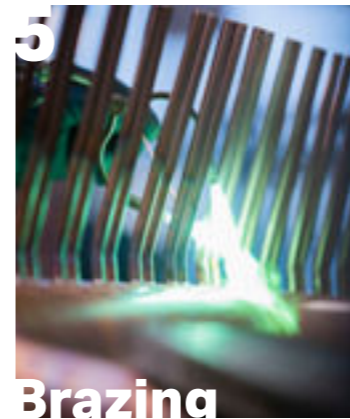

3 End-forming

End-forming - Custom processing: end closing, expansion, reduction, tapering, flaring, ...

4 Drilling

CFI has 5 automatic drilling lines and a LASERTUBE, to carry out processings of drilling, grooving, flow-drilling, T-drilling

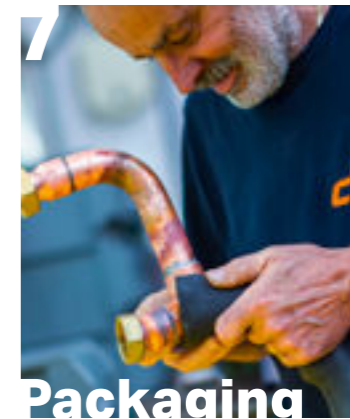

5 Brazing

Brazing - Qualified brazing operators, certified process, monitored by an external body to guarantee the highest quality

6 Tig Welding

Tig Welding - Qualified welders, certified process, monitored by an external body to guarantee the highest quality

7 Packaging

Packaging - Labeling, insulation, and custom packaging for specific customers

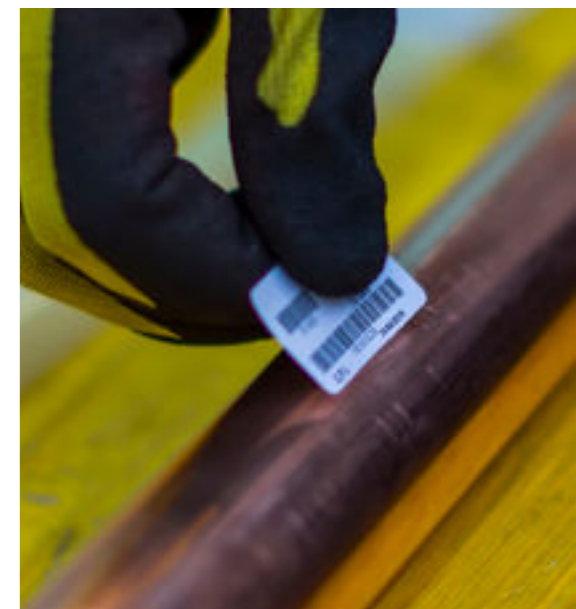

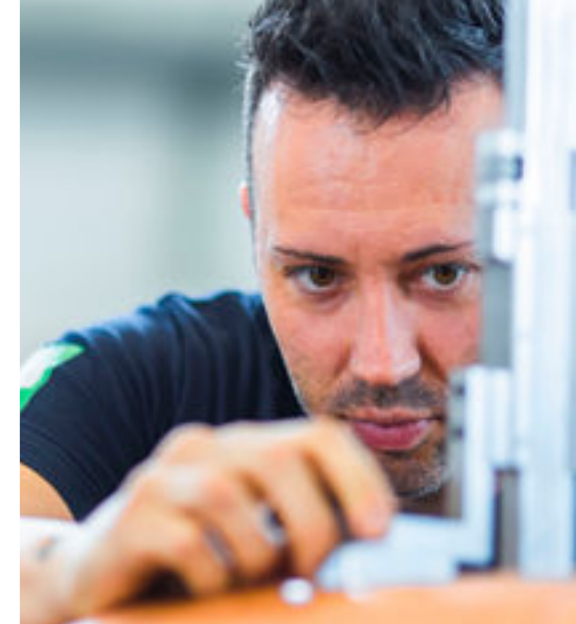

8 Shipping

Shipping - Material identification, packing list, shipment traceability

QUALITY

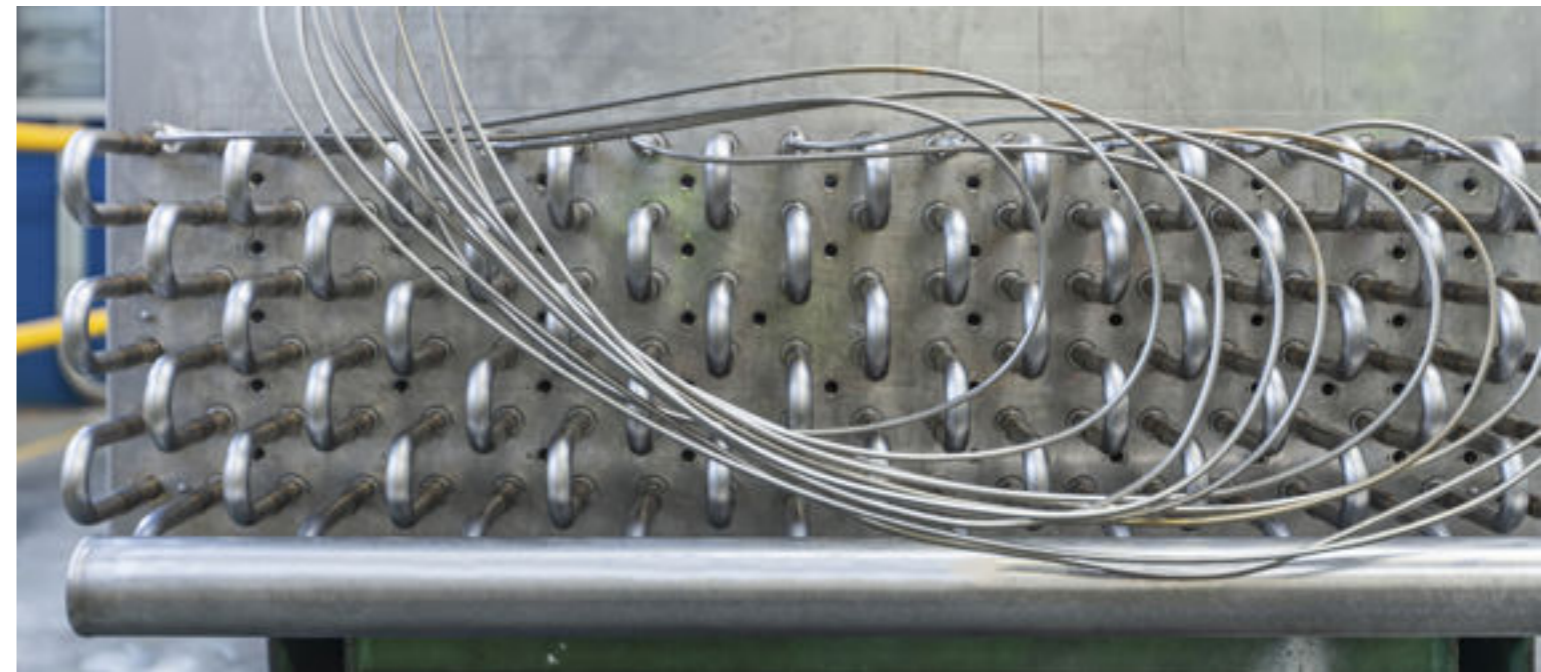

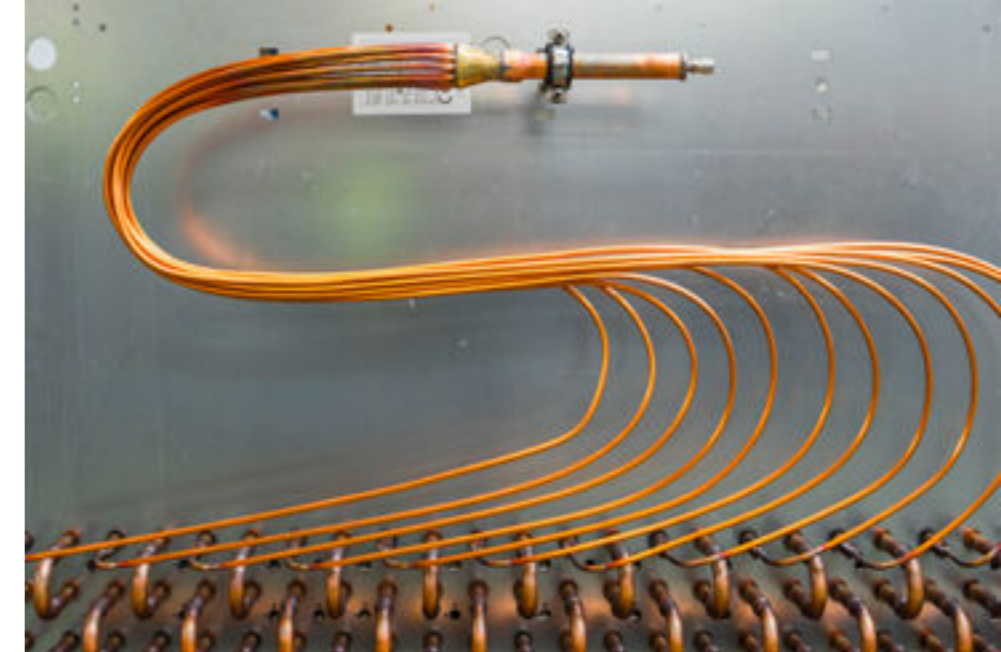

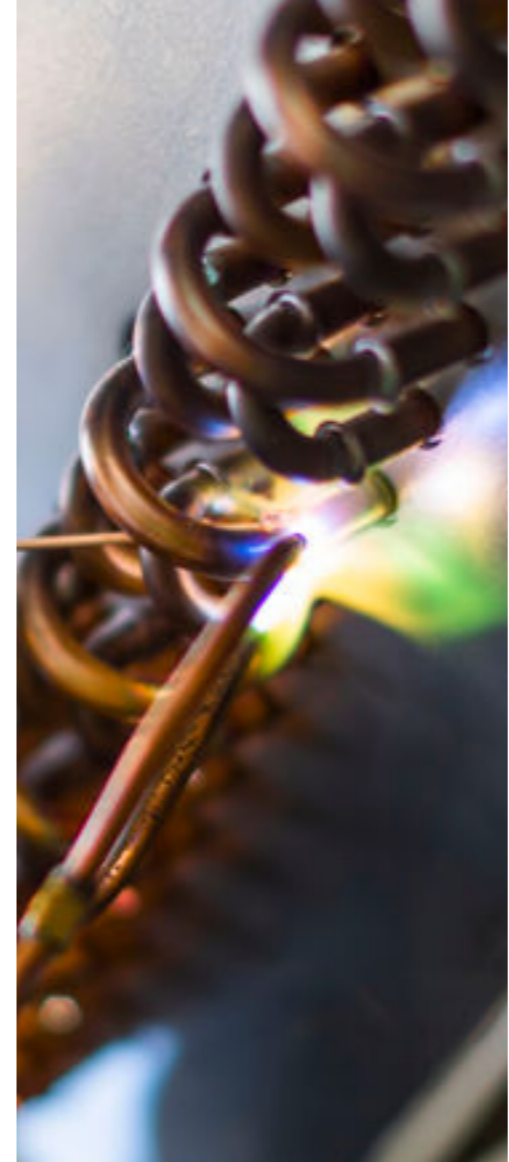

Since 2016 CFI has equipped itself with an integrated system with the UNI EN ISO 9001: 2015 standard for Quality, UNI EN ISO 14001: 2015 standard for Environmental, and according to the UNI EN 18001: 2007 standard for Health and Safety management with Certiquality certification body.

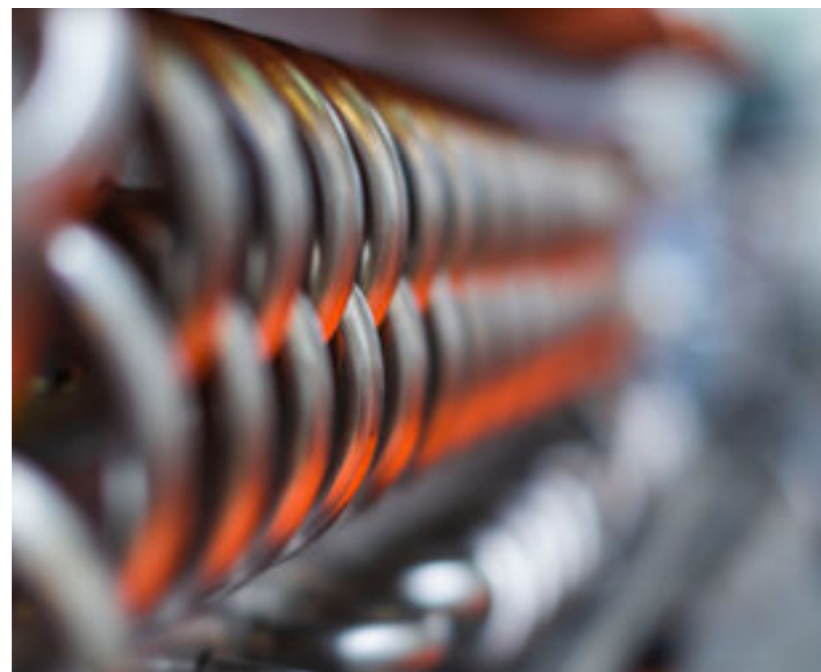

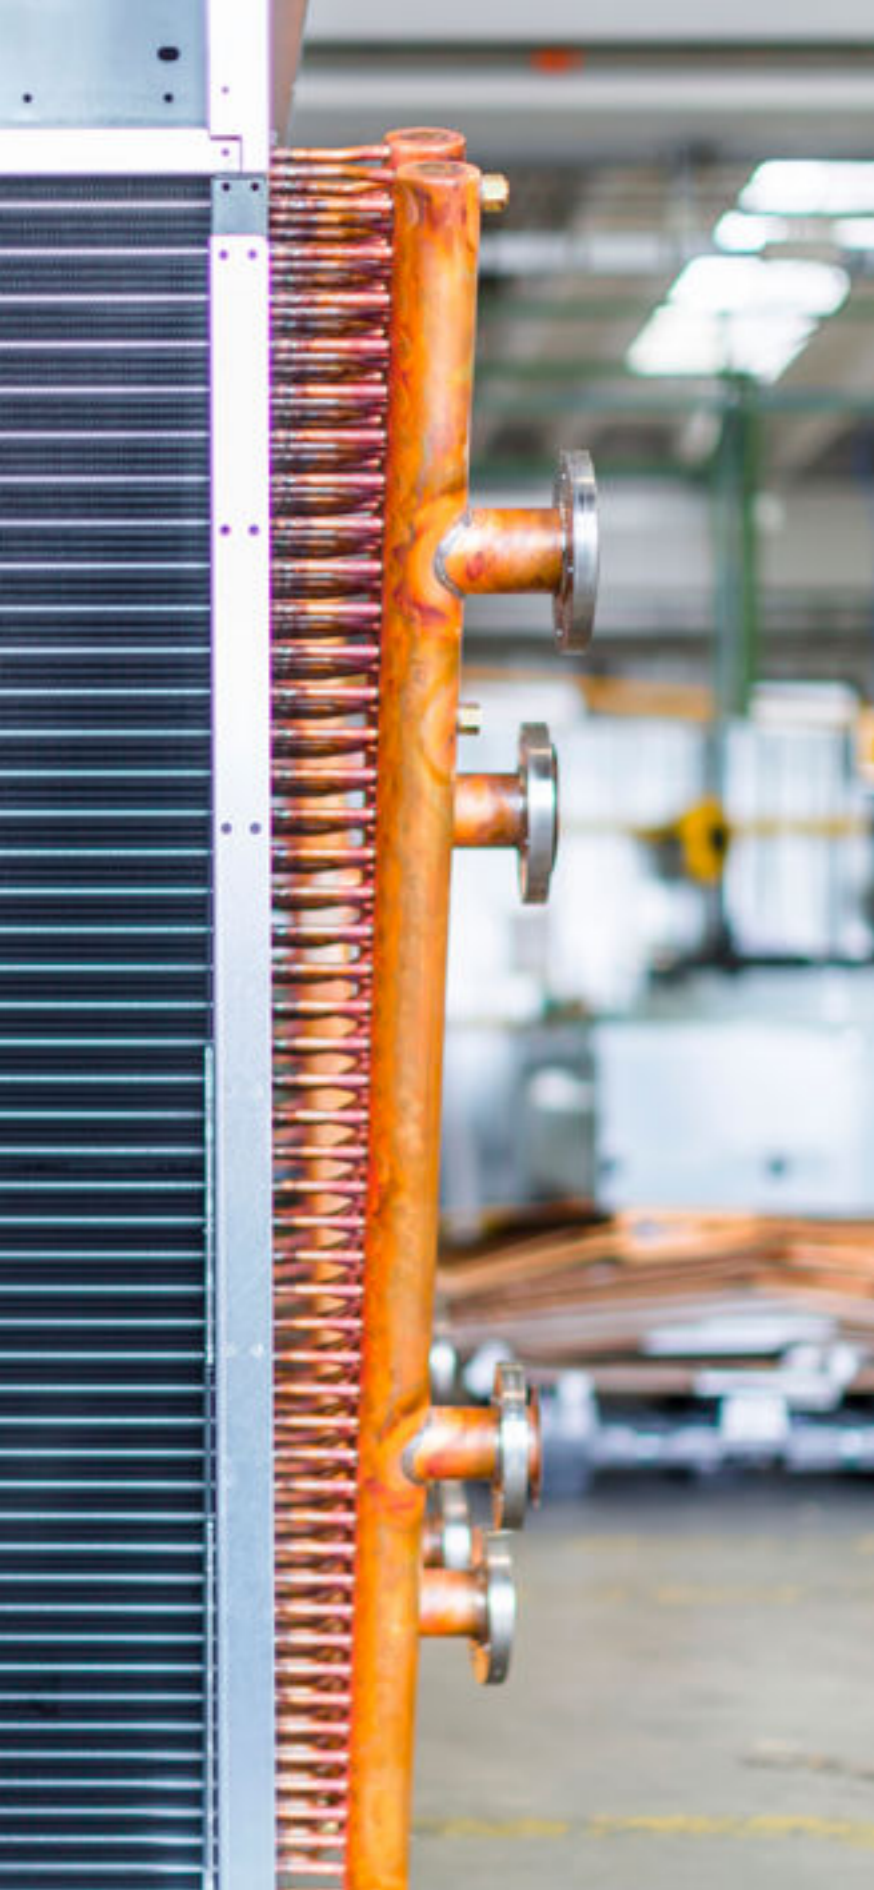

PARTNERSHIP AND APPLICATIONS

CFI products are exported throughout the European market, in the Balkan area, in America, Asia, Africa and the Middle East. Thanks to the consolidated partnership with the major players in the industrial air conditioning and refrigeration market, CFI can boast of being present directly or indirectly in some of the most prestigious buildings worldwide.
